STEEL
TUBULAR STRUCTURES

Application areas

- ◆ HYPERMARKETS
- ◆ GARDEN CENTER
- ◆ DIY
- ◆ SUPERMARKETS
- ◆ DISCOUNT

DESCRIPTION

Designed to delimit the areas of the sales surfaces, they allow designers to create devices intended to direct customers along defined paths.

They are an extra weapon to protect the perimeters of the sales areas from possible thefts without compromising the aesthetics of the store. Modular and easy to install, they are made using uprights in chromed or painted steel of diam. equal to 48 mm and chromed tubular diam. 40 mm. Rectangular steel base hidden by cover (base cover) in chromed or painted steel. The connecting sleeves are made of chromed or paintable zamak.
